

## **Characteristics of English and Mother Tongue Languages**

It is important to note that EL and the three MTLs have different scripts and their own unique characteristics as a language. The main characteristics of each language are:

Language	Characteristics of the Language in Print
English Language (Standard Singapore English)	<ul> <li>Known as an alphabetic language</li> <li>Letters form words and words make up phrases and sentences</li> <li>Read from left to right</li> </ul>
Chinese Language (Mandarin)	<ul> <li>Known as a morphographic language where characters represent syllables that hold meaning</li> <li>Each character made up of different components that give clues to how it is pronounced and its meaning</li> <li>Individual characters have meaning and can be combined to form words (e.g., bookshelf), phrases and sentences</li> <li>Can be read from top to bottom, left to right; at times, can be read from right to left</li> </ul>
Malay Language (Bahasa Melayu)	<ul> <li>Known as an alphabetic language</li> <li>Letters form words and words make up phrases and sentences</li> <li>Has different vowel sounds from the English Language</li> <li>Has different syntax and grammatical structures from the English Language</li> <li>Read from left to right</li> </ul>
Tamil Language	<ul> <li>Tamil is alphasyllabary that represents sounds at the syllable level</li> <li>Letters form words and words make up phrases and sentences</li> <li>Different vocabulary, syntax and grammatical structures for spoken Tamil and written Tamil</li> <li>Read from left to right</li> </ul>
